**Online Best Practices:** This session will serve as the introduction to the rest of the Educational Sessions. The session will address basic tips, tricks, and techniques for keeping your computer, your family, and you safer online.

**Cyber-bullying :** The goal of this session is to increase awareness and understanding of cyber-bullying and its risks. Topics will include types and risks of cyber-bullying and activities to help identify cyber-bullying.

**Online Privacy:** This session will address the risks to online privacy as well as safety with a focus on social networking sites. We will discuss how much privacy can be expected online, why privacy is difficult to maintain, and ways to help maximize your privacy and safety.

**Phishing and Scams:** The purpose of this learning session will be to identify common Internet scams, describe how phishing scams work, and demonstrate techniques for safer web browsing.
